a medida de tus sueños

Ahora, en Revestex Unitrama, también fabricamos su alfombra a medida con la calidad y profesionalidad que nos caracteriza.

La elección del tipo de alfombra adecuada depende de muchos factores como: el lugar donde irá colocada, el uso que le vamos a dar, el espacio que disponemos y el tipo de decoración que tengamos, por ello, le contamos tres sencillos pasos a tener en cuenta a la hora de elegir su alfombra: tamaño, color, forma y acabado.

NUNCA DEBERÁN EMPLEARSE

Bencina: por ofrecer peligro de incendio.

Amoniaco líquido: porque destruye los colores.

Jabón: por ser alcalino.

Detergentes alcalinos: porque atacan la alfombra.

Cuando se manche la alfombra conviene extraer lo más rápido posible el líquido no absorbido. Se utilizará una tela de algodón absorbente o un papel secante para eliminar la mayor cantidad posible de líquido derramado. Si la mancha es fuerte y ha penetrado en el interior de la alfombra, conviene colocar una materia absorbente debajo de la misma.

CONSERVACIÓN

Se aconseja durante los primeros meses un ligero cepillado con una escoba blanda (nunca con cuerpos duros). Se observará durante esta limpieza, que la alfombra pierde algo de pelusa: ello es consecuencia natural del obligado tundido de la misma durante el proceso de fabricación, por tanto es normal que ello ocurra.

Puede que algunos hilos sobresalgan de la superficie del pelo, en ese caso no tire de ellos, córtelos con unas tijeras y déjelos al mismo nivel que el resto de pelo.

Después se verificará un barrido diario siempre en la dirección del pelo y una pasada de aspirador semanal no muy fuerte.

Se recomienda durante los dos primeros meses no utilizar el aspirador ni ningún producto de limpieza.

Dos primeros meses: solamente un ligero cepillado o barrido.

Meses sucesivos: cepillado-aspirador.

Al año: cepillado. Limpiar con aspirador. Aplicar producto de limpieza.

Secar. Cepillado. Aspirado.

Cleaning

We recommend a deep cleaning at least one a year. A cotton cloth can be used in such a way that whatever liquid is employed as a cleaning agent, only moisture is transmitted to the rug, avoiding always soaking it. It should be left to dry for several hours. It is important not to walk on the rug until it is totally dry and brushed. Neutral detergents should be used for cleaning – dry foam ones are recommended.

SHOULD NEVER BE USED

Petrol: because of fire hazard.

Liquid ammonia: because it damages the colours.

Soap: because of its alkaline nature.

Alkaline detergents: because the rug is attacked.

When staining the rug, the liquid not absorbed should be removed as quickly as possible. An absorbent cotton cloth or blotting paper should be used to remove as much spilled liquid as possible. If the stain is deep and permeates the rug, we recommend placing an absorbent material under it.

CONSERVATION

During the first months, it is recommended a slight brushing with a soft broom (never a hard one). It will be noted during this cleaning the carpet loses some lint: it is a natural consequence of the forced shearing during the manufacturing process, so it is expected to occur. Some strands may protrude from the surface. In that case, do not pull them, cut them with scissors and leave them at the same level as the rest of fur surface.

Then it should be daily swept towards fur direction and slightly hoovered once a week.

During the first two months, it is recommended not to use a hoover or any cleaning product.

First two months: only slightly brushing or sweeping.

Following months: brushing-hoovering

After one year: brushing, hoovering, applying a cleaning product, drying, brushing, and hoovering.
